

PROJECT SCOPE

Project Title : Entry / Exit System for IIITB

Project Number : 09

Project Leader : Sri Sumanth

Anticipated Project Start Date : 24-Aug-2018

Sponsor : IIITB Admin

Date Prepared : 22-Aug-2018

Project Risk Level : Only Low level risks

Estimated Completion Date : 28-Sep-2018

Team Members : Sri Sumanth(Project Lead)

Student1 (Application Developer 1)

Student2 (Application Developer 2)

Student3(Designer)

Student4(Database Manager)

Student5(Application Developer 3)

Purpose of project :

- To store and manage the records of entry and exit of people.
- It includes cleaning staff, faculty , administration people and guests
- To provide the restricted access to the guests not belonging to the college.
- To know the details of the students entering into the college during curfew timings.

Background :

- To avoid entry of outside people without having prior permissions .
- Irregular movement of students in and out the campus.
- Increase of people outgoing and incoming in curfew times because of no proper records of their movement.
- Unavailability of records at crucial emergency times.

Deliverables :

An entry/exit management with :

- Option to store the records of students coming in curfew hours and directly mail to warden of the college.
- All records of inflow and outflow of all people.
- Efficient Database system to maintain these records
- Regulated entry and exit to the outsiders without prior permission.
- Software which work with the data given by the barcode scanner.

StakeHolders :

- Team Members of the project
- IIITB Administration

Resource Requirements :

- Financial budget.
- Server to maintain Database.
- Bar code scanners
- Entry and Exit rules of IIITB.

Timeline :

- 25-aug-2018:- Planning and Designing Databases and software required.
- 28-aug-2018:-Developing the designed software
- 15-Sep-2018:-Testing with Demo data.
- 17-Sep-2018:-Making changes as per the output from the testing before.

- 20-Sep-2018 : Final Testing.
- 28-Sep-2018 : Final Deployment.
